PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General, Public Health and Marine-Hospital Service.]

Statistics of plague in California.

Total cases of plague at San Francisco verified bacteriologically to May 16, 121; total cases verified clinically, 38; total deaths, 77. The last case at San Francisco was taken sick January 30 and confirmed by bacteriological examination as plague February 8, 1908. Date of finding of last plague-infected rat, May 26.

The last case at Oakland, Cal., died December 22, 1907. The last plague-infected rats at Oakland were found during the week ended April 11, 1908. The only case at Berkeley, Cal., died September 1, 1907. The only case at Point Richmond, Cal., was taken sick November 27, 1907, and recovered.

Reports from San Francisco, Cal.—Plague-prevention work at San Francisco and in Contra Costa County, Cal.

Passed Assistant Surgeon Blue reports:

SAN FRANCISCO, CAL.

Week ended May 30.

Sick inspected	16
Dead inspected	100
Premises inspected.....	17,235
Houses disinfected	122
Buildings condemned	6
Nuisances abated	2,987
<hr/>	
Rats found dead	220
Rats trapped	3,683
<hr/>	
Total rats taken.....	3,903
<hr/>	
Rats identified:	
Mus decumanus.....	3,096
Mus musculus.....	448
Mus rattus.....	64
<hr/>	
Total.....	3,608
<hr/>	
Rats examined bacteriologically	2,206
Rats infected with bacillus pestis.....	1
Poisons placed	145,341

CONTRA COSTA COUNTY, CAL.

Week ended May 23.

sick inspected	66
Dead inspected	3
Premises inspected	395
Nuisances abated	56
Rats trapped	32
Poisons placed	1,500
Notices served	56

Outgoing quarantine transactions.

Passed Assistant Surgeon Hobdy reports, May 29:

Week ended May 23.

Vessels fumigated and certified.....	63
Vessels certified	55

Statistics of plague at Seattle, Wash.

The last case of plague at Seattle died October 30, 1907. The last plague-infected rat was found April 30, 1908, and the diagnosis confirmed bacteriologically during the week ended May 9, 1908.

Report from Seattle, Wash.—Plague-prevention work.

Passed Assistant Surgeon Glover reports, June 1:

SEATTLE, WASH.

Week ended May 30.

Rats received	727
Rats necropsied	618
Plague-infected rats to date	11
Ships inspected	7
Ships fumigated	2

Report from Portland, Oregon—Outbreak of smallpox during month of May, 1908.

Surgeon Magruder reports, June 1:

Eighty-two cases of smallpox occurred in this city during the month of May. The outbreak was confined almost entirely to the members of one of the city public schools, 79 of the 82 cases having occurred at the homes and among the scholars of this school, whose membership numbers about 600. The disease is very mild, no deaths having occurred.

The school was promptly closed by the city health officer and the building disinfected. The scholars were vaccinated and other necessary precautions taken.

Report from Pittsburgh, Pa.—Improved health conditions—Decrease in number of cases of enteric fever.

Surgeon Smith reports, June 1:

Much improvement has taken place in the health of this city since the beginning of the present calendar year in relation to enteric fever. The number of reported cases now averages about 25 a week for the entire city of Pittsburgh, which comprises what was heretofore the cities of Pittsburg and Allegheny, whereas during the previous year the cases were four and five times that number.

The filtering plant for the city water supply, which has been in process of construction for so long, began to be operated practically in January of this year and is now supplying a great part of the city with filtered water.

NOTE.—For previous report by Surgeon Smith on enteric fever at Pittsburg, see Public Health Reports, 1907, page 915.

STATISTICAL REPORTS OF MORBIDITY AND MORTALITY, STATES AND CITIES
OF THE UNITED STATES—UNTABULATED.

CALIFORNIA.—Month of April, 1908. Estimated population, 2,001,-193. Total number of deaths reported to the State board of health, 2,525, including diphtheria 33, enteric fever 28, measles 9, scarlet fever 15, smallpox 2, whooping cough 16, and 423 from tuberculosis.

Sacramento.—Month of April, 1908. Estimated population, 40,000. Total number of deaths, 48, including diphtheria 1 and 10 from tuberculosis. Cases: Diphtheria 8, smallpox 1, and scarlet fever 6.

FLORIDA.—Reports from the State board of health for the week ended May 30, 1908, show as follows: Enteric fever—*Jacksonville*, 8 cases; *Ocala*, 3 cases; *Daytona*, *McClenny*, *Dade City*, *Lemon City*, and *Tallahassee*, each 1 case. Diphtheria—*Jacksonville* and *Tampa*, each 1 case. Tuberculosis—*Jacksonville*, *Ocala*, *Havana*, and *Key West*, each 1 case.

ILLINOIS—Quincy.—Month of May, 1908. Estimated population, 43,000. Total number of deaths, 56, including diphtheria 1, enteric fever 1, and 8 from tuberculosis. Cases: Diphtheria 12 and enteric fever 3.

INDIANA—Anderson.—Month of May, 1908. Estimated population, 25,398. Total number of deaths, 27, including 7 from tuberculosis. Cases: Tuberculosis 7.

Muncie.—Month ended June 4, 1908. Estimated population, 34,036. Total number of deaths, 20, including 4 from tuberculosis. Cases: Diphtheria 3, enteric fever 1, scarlet fever 4, tuberculosis 2, smallpox 4, and whooping cough 6.

Iowa—Cedar Rapids.—Month of May, 1908. Estimated population, 30,000. Total number of deaths, 34, including diphtheria 2, scarlet fever 1, whooping cough 1, and 3 from tuberculosis. Cases: Scarlet fever 9, diphtheria 2, measles 4, and smallpox 2.

Davenport.—Month of May, 1908. Estimated population, 40,000. No deaths reported. Cases: Diphtheria 5, scarlet fever 4, enteric fever 6, measles 30, smallpox 7, and whooping cough 5.

KENTUCKY—Henderson.—Month of May, 1908. Estimated population, 17,500. Total number of deaths, 14. Cases: Enteric fever 8, measles 4, and whooping cough 1.

MASSACHUSETTS.—Reports from the State board of health for the month of April, 1908, show as follows: Week ended April 4, 1908. Forty-six cities and towns having an aggregate estimated population of 2,305,900, report 796 deaths, including diphtheria 11, enteric fever 4, measles 8, and 76 from phthisis pulmonalis. Cases: Diphtheria 161, enteric fever 28, measles 886, scarlet fever 178, whooping cough, 11, and tuberculosis 150.

Week ended April 11, 1908. Number of localities reporting, 47. Estimated population 2,318,465. Total number of deaths, 742; diph-

theria 14, enteric fever 3, measles 6, phthisis pulmonalis 66. Cases: Diphtheria 131, enteric fever 320, measles 924, scarlet fever 214, whooping cough 20, and tuberculosis 122.

Week ended April 18, 1908. Number of localities reporting, 47. Estimated population, 2,266,443. Total number of deaths, 808; diphtheria 7, enteric fever 22, measles 10, phthisis pulmonalis 76. Cases: Diphtheria 123, enteric fever 245, measles 868, scarlet fever 178, whooping cough 16, and tuberculosis 97.

Week ended April 25, 1908. Number of localities reporting, 46. Estimated population, 2,306,835. Total number of deaths, 778; diphtheria 10, enteric fever 18, measles 10, phthisis pulmonalis 55. Cases: Diphtheria 126, enteric fever 140, measles 882, scarlet fever 192, whooping cough 16, and tuberculosis 100.

MICHIGAN.—Month of April, 1908. There were 3,203 deaths returned to the department of state as having occurred during the month of April, which corresponds to an annual death rate of 14.8 per 1,000 estimated population. There was a decrease of 178 from March, and a decrease of 9 from the number returned for the corresponding month of 1907.

Important causes of death were as follows: Pulmonary tuberculosis, 218; other forms of tuberculosis, 37; enteric fever, 35; diphtheria and croup, 19; scarlet fever, 25; measles, 7; whooping cough, 38.

MONTANA.—Month of April, 1908. Estimated population, 280,000. Reports to the State board of health show as follows: Total number of deaths, 375, including diphtheria 3, enteric fever 3, scarlet fever 6, measles 1, whooping cough 3, and 20 from tuberculosis. Cases: Diphtheria 108, enteric fever 10, measles 96, scarlet fever 159, and smallpox 110.

Anaconda.—Month of April, 1908. Estimated population, 12,267. Total number of deaths, 16. Cases: Scarlet fever 1 and diphtheria 1.

Billings.—Month of April, 1908. Estimated population, 12,000. Total number of deaths, 20, including diphtheria 1, scarlet fever 1, whooping cough 1, and 1 from tuberculosis. Cases: Diphtheria 12, scarlet fever 4, and measles 7.

Bozeman.—Month of April, 1908. Estimated population, 4,000. Total number of deaths, 8. Cases: Diphtheria 1 and smallpox 1.

Great Falls.—Month of April, 1908. Estimated population, 16,000. Total number of deaths, 18, including enteric fever 1 and 2 from tuberculosis. Cases: Diphtheria 8, enteric fever 4, measles 1, and scarlet fever 5.

Helena.—Month of April, 1908. Estimated population, 16,770. Total number of deaths, 20, including diphtheria 1 and 4 from tuberculosis. Cases: Measles 1, scarlet fever 6, and smallpox 3.

Livingston.—Month of April, 1908. Estimated population, 3,500. Total number of deaths, 9, including 1 from tuberculosis. Cases: Diphtheria 1 and measles 7.

Missoula.—Month of April, 1908. Estimated population, 5,000. Total number of deaths, 22, including 2 from tuberculosis. Cases: Diphtheria 9, scarlet fever 21, measles 8, and smallpox 43.

NEW HAMPSHIRE—Concord.—Month of May, 1908. Estimated population, 20,000. Total number of deaths, 37, including diphtheria 1, enteric fever 1, and 2 from tuberculosis. Cases: Measles 13, diphtheria 1, scarlet fever 1, and tuberculosis 2.

Franklin.—Month of May, 1908. Estimated population, 6,000. Total number of deaths, 7. Cases: Measles 44, diphtheria 1, and scarlet fever 2.

NEW JERSEY.—Reports to the State board of health for the month ended May 15, 1908, show a total of 2,602 deaths, including diphtheria 41, enteric fever 28, measles 27, scarlet fever 46, whooping cough 23, and 408 from tuberculosis.

Morristown.—Month of May, 1908. Estimated population, 12,500. Total number of deaths, 25. Cases: Tuberculosis 1, measles 13, diphtheria 3, whooping cough 1, and scarlet fever 10.

Newark.—Six days ended May 29, 1908. Estimated population, 305,000. Total number of deaths 77, including diphtheria 3, enteric fever 2, measles 2, scarlet fever 3, and 11 from tuberculosis. Cases: Diphtheria 7, enteric fever 2, and scarlet fever 36.

NEW YORK—Buffalo.—Month of May, 1908. Estimated population, 410,000. Total number of deaths, 457, including diphtheria 1, measles 9, scarlet fever 7, whooping cough 7, and 48 from tuberculosis. Cases: Diphtheria 35, enteric fever 17, measles 304, scarlet fever 180, smallpox 1, whooping cough 120, and tuberculosis 83.

Ohio—Canton.—Month of April, 1908. Estimated population, 40,000. Total number of deaths not reported. One death from tuberculosis and 1 from diphtheria. Cases: Diphtheria 2, scarlet fever 8, smallpox 1, and tuberculosis 1.

Zanesville.—Month of May, 1908. Estimated population, 30,000. Total number of deaths, 26, including enteric fever 1, scarlet fever 1, and 1 from tuberculosis. Cases: Enteric fever 17, scarlet fever 10, and diphtheria 1.

PENNSYLVANIA—Dunmore.—Month of May, 1908. Estimated population, 17,500. Total number of deaths, 21, including 1 from diphtheria. Cases: Scarlet fever 1, diphtheria 1, and measles 3.

New Castle.—Month of May, 1908. Estimated population, 38,000. Total number of deaths not reported. Cases: Diphtheria 3, measles 22, and whooping cough 2.

Smallpox in the United States as reported to the Surgeon-General, Public Health and Marine-Hospital Service, December 28, 1907, to June 12, 1908.

For reports received from June 28, 1907, to December 27, 1907, see PUBLIC HEALTH REPORTS for December 27, 1907.

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]

FOREIGN AND INSULAR

CURRENT QUARANTINE MEASURES.

[From the *Veröffentlichungen des Kaiserlichen Gesundheitsamtes*, Berlin, May 13 and 20, 1908.]

CHOLERA.

ITALY.—April 30. Order of January 9, with regard to cholera on the coast of the Hedjaz, suspended. Ports of Yembo and Jiddah declared cholera-infected.

PLAQUE.

BELGIUM.—April 30. Proclamation of January 31, relative to infected Russian ports on the Baltic and Black seas and the Sea of Azov, declared out of force.

BRITISH INDIA.—April 13. The port of Verawal, in the Presidency of Bengal, declared plague-infected.

ITALY.—April 30. The port of La Guaira declared plague-infected.

BARBADOS.

Report from Bridgetown—Inspection of vessels.

Acting Assistant Surgeon Urquhart reports, May 23: Week ended May 23. Bills of health were issued to 6 steamships having 183 persons in their crews and with 37 passengers. No quarantinable diseases were reported during the week for the port or island.

BRAZIL.

Report from Rio de Janeiro—Inspection of vessels—Mortality—Smallpox.

Acting Assistant Surgeon Stewart reports, May 14:

Week ended May 10. Vessels inspected and received bills of health: May 5, the German steamship *Getrune*, for New York, in cargo of coffee, with no change in the crew personnel and with 2 cabin and 1 steerage passengers from this port. The steerage passenger was vaccinated after coming on board the vessel. On the same date the British steamship *Saxon Prince*, in cargo of coffee for New York, with

1 new member of the crew transferred from another vessel, and with 2 first-cabin passengers. No other vessels left this port for the United States or their insular possessions during the week.

Mortality.—Total population, 628,675. Total deaths, 303. No deaths due to yellow fever or plague, and no cases of these diseases reported. At the close of the week there were, in the Hospital São Sebastião, 207 cases of smallpox under treatment. During the week there were 141 new reported cases of smallpox with 50 deaths.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Mengis reports:

Week ended May 28. Present officially estimated population, 10,000. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 22	Mobila	New Orleans.....	50	10	29
22	Saba.....	London via Norfolk	32	9	0
27	Haakon VII.....	New Orleans.....	22	0	0

CHINA.

Report from Hongkong—Quarantine restrictions—Plague and smallpox—Statistics of plague at Hongkong and Kowloon.

Acting Assistant Surgeon Hough reports:

Week ended April 25. Restrictions enforced by Hongkong remain as reported on March 28. Restrictions enforced against Hongkong remain as reported on March 28. Quarantinable diseases: Plague, 29 cases, 26 deaths; smallpox, 12 cases, 10 deaths.

Vessels inspected and granted bills of health, 7.

Emigrants from Hongkong to the Philippine Islands for the week ended April 4: Examined, 41; rejected, 30.

Statistics of mortality from plague at Hongkong and Kowloon.

Year.	Hongkong.			Kowloon.		
	Total.	Plague.	Smallpox.	Total.	Plague.	Smallpox.
1905.....	614	160	28	259	96	8

22	Manistee	New York	47	2	1
23	Taunton.....	Mobile	24	0	0
23	Juan	New Orleans	30	3	0

Two bills of health for Panama ports were vised and certificates were issued to 25 passengers bound for Colon.

CUBA.

Report from Cienfuegos—Inspection and fumigation of vessels—Summary for month of May, 1908.

Acting Assistant Surgeon Marsillan reports, June 1:

Report for the week ended May 30.

Vessels inspected.....	1
Vessels inspected and fumigated.....	5
Bills of health issued.....	6
Members of crews inspected.....	185
Passengers inspected landed at this port.....	6
Immune certificates issued.....	2

No quarantinable disease was reported in the city during the week.

The Superior Board of Health of Cuba on May 26 declared that there were no cases of yellow fever in Cuba.

Transactions for the month of May, 1908.

Vessels inspected.....	6
Vessels inspected and fumigated.....	14
Bills of health issued.....	20
Members of crews inspected.....	591
Members of crews inspected landed at this port	1
Members of crews inspected taken on this port	2
Passengers inspected (13 landed here, 1 in transit).....	14
Immune certificates issued	10

No quarantinable diseases were reported.

Report from Habana—Inspection and fumigation of vessels—Sanitary police and antimosquito work—Heavy rainfall at Habana and throughout the island—Drought effectually broken.

Passed Assistant Surgeon Amesse reports:

Week ended May 30.

Vessels inspected and bills of health issued	20
Vessels not inspected and bills of health issued.....	1
Members of crews of outgoing vessels inspected	882
Members of crews of outgoing vessels not inspected.....	35
Passengers of outgoing vessels inspected	914
Passengers of outgoing vessels not inspected.....	17
Certificates of immunity to yellow fever issued	30
Certificates issued to passengers bound for southern ports	198
Certificates issued to passengers bound for New York	157
Vessels fumigated prior to sailing.....	6

June 1. Sanitary conditions in Habana continue satisfactory. The board of health announces that from 1,400 to 2,000 dwellings are inspected daily by the sanitary police, whose work is directed by 50 inspectors. Deposits found containing mosquito larvæ number 3 to 10 daily, and of these about one-fifth are shown to be collections of the larvæ of *Stegomyia calopus*. When one of these deposits is discovered the householder is warned of his infraction of the sanitary ordinances, and a second offense is punishable by a fine.

There was heavy rainfall in Habana and throughout the interior during the latter part of the week, but the wet season is not yet fully established.

June 8. Drought effectually broken in practically every district of Cuba.

Report from Matanzas—Inspection of vessels—Fruit vessel Maud dispatched with sanitary guard—Summary of transactions, month of May, 1908.

Acting Assistant Surgeon Nuñez reports, June 1:

Week ended May 30. Three bills of health were issued to vessels bound for United States ports in good sanitary condition. The Norwegian steamship *Maud*, engaged in the fruit trade, arrived in this port May 30 and left same day with the United States sanitary guard on board for Mobile, Ala., via Cuban ports. No vessel was fumigated during the week.

No cases of yellow fever have been reported either in the city or province since December last.

Annual rate of mortality per thousand for the eleven days, 32.88; estimated population 35,515.

During the month of May 19 bills of health were issued to vessels clearing for the United States having a total number of 500 members of crew, and 15 passengers in transit for various Cuban ports. Four vessels bound for Gulf ports were fumigated, and the steamship *Maud* cleared twice for Mobile, Ala., in accordance with the fruit ports regulations. With the exception of 3 cases of leprosy no quarantinable disease was reported within this district during the past month.

The total number of deaths from all causes during the month was 83, which corresponds to an annual mortality rate of 28.04 per thousand.

Reports from Santiago—Inspection of vessels—Fumigation of vessel to destroy mosquitoes—Yellow fever case previously reported discharged cured.

Acting Assistant Surgeon Wilson reports, May 26 and June 2:

Week ended May 23. Bills of health issued to 4 vessels bound for the United States and its dependencies. The Cuban steamship *Julia* bound for San Juan, P. R., via Santo Domingo, was fumigated before leaving, to kill mosquitoes.

The rainy season has set in, with showers nearly every day.

Week ended May 30. Bills of health issued to 4 vessels bound for the United States.

May 25 the case of yellow fever reported at Santiago May 2 (see Public Health Reports May 8, 1908, page 614) was discharged recovered.

No quarantinable disease was reported during the week.

June 12, 1908

EGYPT.

Measures taken with regard to the pilgrimage.

(From the Bulletin Quarantenaire, Alexandria, May 14.)

At its session of May 5, the sanitary, maritime, and quarantine council of Egypt decided to declare the pilgrimage terminated as soon as the pilgrims embarked in Syria on the *Mariout* shall have arrived at Tor and to suppress, in consequence, all measures established with a view to the return of the pilgrimage.

NOTE.—The *Mariout* having arrived at Tor May 7, the measures referred to were discontinued on the same day.

Medical visit and the disinfection of soiled linen of passengers of the third class coming from Syria and Constantinople continue in force.

Delayed Egyptian pilgrims, who may eventually arrive by way of the sea at Port Said or Alexandria, shall undergo quarantine with disinfection at the lazarettoes at those ports.

It is still understood that foreign pilgrims shall not be permitted to enter Egypt.

All measures remain in force at the camp at Suakin, in view of the large number of Sudanese pilgrims who have not returned.

GUATEMALA.

Reports from Puerto Barrios, fruit port.

Acting Assistant Surgeon Wailes reports:

Week ended May 19. Present officially estimated population, 250. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 18	Belize	Mobile	18	3
17	Frutera	New York	26	2
19	Mobila	New Orleans	41	25

Week ended May 28. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 22 28	John Wilson	New Orleans	17 29	0	0

HAWAII.

Report from Honolulu—Examination of rats for plague infection.

Passed Assistant Surgeon Currie reports through Chief Quarantine Officer Cofer that, during the week ended May 18, 449 rats were examined bacteriologically at the plague laboratory of the Service at Honolulu. No plague infection found.

Traps set each night, 468; ounces of poison placed, 77.

Rats identified:

Mus decumanus.....	63
Mus rutilus	143
Mus alexandrus	14
Mus musculus.....	91

HONDURAS.

Reports from Ceiba, fruit port—Sanitary work.

Acting Assistant Surgeon Jumel reports as follows:

Week ended May 26. Present officially estimated population, 6,500. General sanitary condition of this port and the surrounding country during the week good. Road construction and surface drainage are important active factors in present scheme for local sanitary improvement. Several miles have already been completed. Weather very hot and dry.

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
May 20	Viator	17	0	0	0
22	Rosina.....	34	6	0	0
24	Marietta Di Giorgio.....	18	0	0	0
24	Harald.....	19	0	0	0

Sanitary conditions at Coxenhole, island of Roatan.

Doctor Jumel further reports, May 26:

May 21 I made an investigation of the prevailing health and sanitary conditions of Coxenhole, port of entry, island of Roatan, a brief report of which is as follows:

Coxenhole, port of entry, situated in the southwestern extremity of the island of Roatan and about 32 miles to the north-northeastward from Ceiba, is a small town with an estimated population of about 1,000 inhabitants, most of whom are settlers from Jamaica, the Cayman Islands, and British Honduras, with the exception of several white people and about 100 native Honduraneans. The town is scatteringly built along the beach of an open bay and is swept daily by strong trade winds, which exercise a destructive effect upon innumerable mosquitoes.

The port is a large distributing point for cocoanuts and other produce of the island, and on that account not a few fruit vessels call at the port for this class of cargo. The sanitary conditions, in a general way, are good. The streets are kept fairly well cleaned and are roughly equipped with surface drains. The dwelling houses are mostly

June 12, 1908

light wooden structures, well ventilated and raised several feet from the ground. Natural springs in the immediate neighborhood afford an abundant supply of good drinking water. This is an advantage at all times and particularly so in the dry season, which is an annual occurrence and is always protracted. For washing and purposes other than drinking, surface wells exist in all parts of the town, in some of which numerous *Culex* and *Anopheles* larva were observed. The health conditions are fairly good. The port is a common anchorage for many sailing vessels plying between Central America, Mexico, and the West Indies, and therefore is open to infection at all times. Malarial fevers are quite common and are mostly observed among the natives.

Report from Puerto Cortez, fruit port—Few Stegomyia calopus present.

Acting Assistant Surgeon Ames reports: Week ended May 23. Present officially estimated population, about 2,400. General sanitary condition of this port and the surrounding country, very good. Few *Stegomyia calopus* found.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 19	Alabama	Mobile	18	0	0
19	Mobila	New Orleans.....	50	5	0
20	Utzstein	do.....	15	0	0
22	John Wilson.....	do.....	17	1	0

Temperature taken of all persons on above-named vessels on day of sailing.

Report from Tela, fruit port.

Acting Assistant Surgeon Roe reports as follows:

Week ended May 23. Present officially estimated population, about 1,250. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.
May 21	Rosina	New Orleans.....	34	0	0
23	Harald	Mobile.....	18	0	0

INDIA.

Reports from Calcutta—Transactions of Service—Cholera, plague, and smallpox—Plague in India and Bengal.

Acting Assistant Surgeon Allan reports, April 22:

During the week ended May 9, a bill of health was issued to the steamship *Lindenfels*, bound for Boston and New York with a total crew of 72. The usual precautions were taken—the holds fumigated, rat guards placed on the wharf lines, and the Asiatics' effects disinfected.

During the week ended April 11 there were 221 deaths from cholera, 142 from plague, and 24 from smallpox in Calcutta. In India during the week ended April 4 there were 10,665 cases of plague with 9,015 deaths. In Bengal during the week ended April 11 there were 1,210 cases of plague with 1,223 deaths.

The cholera epidemic in Calcutta.

The following is received from Consul-General Michael, under date of April 30:

Epidemic cholera is raging in Calcutta. Those attacked are for the most part Hindus, but there have been some cases, with 4 deaths, among Europeans. The prevailing hot winds carry storms of dust from one part of the city to another, thus disseminating the germs of disease.

ITALY.

Report from Naples—Inspection of vessels—Emigrants recommended for rejection—Smallpox in Italy.

Assistant Surgeon Wollenberg reports, May 18:

Vessels inspected at Naples and Palermo, week ended May 16.

NAPLES.

JAPAN.

Report from Yokohama—Inspection of vessels—Cholera on torpedo boats at naval station at Yokoshuka—Recurrence of smallpox at Shimonoseki.

Passed Assistant Surgeon Cumming reports, May 12:

During the week ended May 9 bills of health were issued to 3 steamships having an aggregate personnel of 328 members of crews and 53 saloon and 249 steerage passengers.

The British steamer *Indrawadi*, bound for New York via Iloilo, was fumigated. Thirty-one steerage passengers embarking here were bathed and 57 pieces of baggage were disinfected.

The sanitary conditions continue good, and no cholera has been reported from Tokyo since my last report, but one case is reported to-day among the torpedo-boat men at Yokoshuka, the naval station near Yokohama. There were cases on the destroyers lying at Shinagawa in this vicinity last autumn.

There has been a recurrence of smallpox at Shimonoseki.

Emigrants recommended for rejection.

Number of emigrants per steamship *Shinano Maru* recommended May 13 for rejection: For Seattle, 2; advised to wait, 7.

Per steamship *Manchuria*, May 13: For Honolulu, 6; advised to wait, 5.

Reports from Kobe—Inspection of vessels—Examination of emigrants—Smallpox—Plague and smallpox at Osaka.

Acting Assistant Surgeon Slade reports, May 5 and 13:

During the week ended May 2, 4 supplemental bills of health were granted to 4 steamships, and 1 original bill of health was granted 1 steamship.

Two hundred and five members of crews and 314 steerage passengers were inspected and 93 steerage passengers bathed. Their effects were disinfected by steam. The number of pieces of baggage steamed was 692. Manifests were viséed for 83,890 pieces of freight, amounting to 2,112 tons.

Emigrants were examined as follows:

Steamship *Minnesota* for Seattle, passed 12, recommended for rejection 23; steamship *China* for Honolulu, passed 76, recommended for rejection 51; and the *China* for San Francisco, passed 3, recommended for rejection 1.

The official returns of infectious disease for the week show 1 case of smallpox with no deaths.

The report from Osaka for the week ended April 25 shows 3 cases of plague with 4 deaths, and 44 cases of smallpox with 47 deaths.

During the week ended May 9, 3 supplemental bills of health were granted to 3 steamships.

Twenty-six members of crews and 449 steerage passengers were inspected; 221 steerage passengers were bathed, and their effects were disinfected by steam. The number of pieces of baggage steamed was 527. The number of pieces of bedding similarly treated, 442. Manifests were viséed for 39,489 pieces of freight, amounting to 3,170 tons.

Emigrants were examined as follows:

Steamship *Shinano-Maru* for Seattle, passed 84, recommended for rejection 71; steamship *Manchuria* for Honolulu, passed 119, recommended for rejection 83; and steamship *Manchuria* for San Francisco, passed none, recommended for rejection 2.

The official returns of infectious diseases for the week show that there were 3 cases of smallpox, with two deaths.

The report from Osaka for the week ended May 2 shows plague 2 cases with 3 deaths and smallpox 48 cases with 30 deaths.

Quarantine no longer enforced at Kobe on account of cessation of smallpox epidemic.

Consul Sharp reports, April 21:

Smallpox having ceased to be epidemic at this port, the quarantine laws and regulations of the United States relative to infected places will from this date be no longer enforced at this consulate.

Reports from Nagasaki—Outbreak of plague on Island of Taira—Measures adopted to prevent spread.

Sanitary Inspector Bowie reports, May 1:

A case of plague developed October 23, 1907, in the village of Taira, an island included in the prefecture of Nagasaki, and by November 7 no less than 7 people were stricken with the disease. The village doctor suspected bubonic plague and at once notified the authorities. Material was collected and sent to the bacteriological laboratory at Nagasaki, but not being suitable, the diagnosis could not be confirmed. One of the quarantine doctors from this port was sent, and the nature of the outbreak was determined November 6. The prefectoral authorities then dispatched quarantine officials, police, and other attendants; established in the village a provisional laboratory, enforced examination of patients and all suspects, as well as of rats, investigated the locality and extent of the disease, disinfected and took such steps as were necessary to prevent the further spread of the disease, caused each case to be reported as it occurred, and made examination of all dead bodies as well as a general health survey. Boundaries were drawn around the infected districts and all communication with the outside was cut off. Preventive disinfection methods and injection of serum were strictly enforced. Rats were killed and all houses cleaned and disinfected. The disease disappeared by December 31, the total number of cases reaching 40, with a mortality of 28 or 70 per cent.

Number of rats killed.....	9,282
Number of rats found infected.....	238
Number of cases of pneumonic plague.....	2
Died.....	2
Number of cases of bubonic plague.....	38
Recovered.....	12
Died.....	26

June 12, 1908

Cases treated at hospital.....	21
Died.....	9
Cases treated at home.....	11
Died.....	11
Cases receiving no treatment.....	6
Number operated on by opening glands and scraping.....	2
Number operated on by opening glands and injecting serum.....	6
Died.....	2
Number injected with serum only.....	4
Died.....	4
Number treated symptomatically.....	4
Died.....	3

The serum used was that of Kitasato, and the quantity from 5 to 20 cubic centimeters. The total number of houses in the town was 1,131, and the inhabitants 6,603, so that the total cases were less than 1 per cent.

Emigrants recommended for rejection.

May 6. Number of emigrants per steamship *Manchuria* recommended for rejection, 6.

MEXICO.

Report from Progreso—Inspection and fumigation of vessels.

Acting Assistant Surgeon Harrison reports, May 30:

May 18 to 30, inclusive. No quarantinable disease has been reported.

Nine vessels have been dispatched with 51 passengers from this port, and 303 members of crews. Of these vessels, 6 were fumigated.

Report from Veracruz—Inspection of vessels.

Acting Assisting Surgeon Jacobs reports, May 24:

During the week ended May 23, 3 vessels bound for United States ports were inspected and fumigated and 3 inspected only.

No quarantinable diseases were reported during the week.

NICARAGUA.

Report from Bluefields, fruit port—Mosquitoes increasing.

Acting Assistant Surgeon Layton reports:

Week ended May 19. Present officially estimated population, 2,500. General sanitary condition of this port and the surrounding country during the week, good. Mosquitoes increasing, especially *Stegomyia calopus*. No quarantinable diseases in this port or in surrounding country.

PHILIPPINE ISLANDS.

Reports from Manila—Smallpox—Inspection of vessels—Smallpox on steamships Jason and Oceano, at Cebu.

Chief Quarantine Officer Heiser reports, April 24 and 30: During the week ended April 18, 16 cases of smallpox, with 7 deaths, were reported in Manila.

April 14 the British steamship *Inverelyde*, en route from Yokohama to New York, was granted a supplemental bill of health. The crew

June 12, 1908

of 40 was inspected and passed just prior to sailing. The cargo was inspected and the manifests were vised.

April 15 the U. S. Army transport *Thomas*, with 195 in the crew and with 1,076 passengers, was granted a bill of health for San Francisco via Nagasaki and Honolulu. The crew and steerage passengers were bathed, and their effects and baggage were disinfected. The cargo and baggage were either disinfected or passed after inspection. The vessel was fumigated with sulphur and disinfected with formaldehyde and bichloride solution while in port. All persons on board were inspected at Mariveles immediately prior to sailing.

April 15 the Norwegian steamship *Skramstad*, rice laden, with 35 in the crew, en route from Saigon to Legaspi, was granted a supplemental bill of health.

April 15 the British steamship *Wray Castle*, bound for Boston and New York, was granted a supplemental bill of health after the usual inspection of personnel and cargo.

April 17 the British steamship *Kaifong*, with 63 in the crew and with 96 passengers, en route from Amoy to Cebu, was granted a supplemental bill of health after the crew and steerage passengers had been bathed and their effects and baggage disinfected at the Mariveles quarantine station.

April 5 the steamship *Jason* from Yokohama, and on April 13 the steamship *Oceano*, from New Castle via Manila, arrived at Cebu, each vessel having a case of smallpox aboard among the crew. The infected parts of the vessel were thoroughly disinfected, all persons were vaccinated, after which permission was given to unload the cargo in quarantine. No further cases of smallpox have been reported on these vessels.

During the week ended April 25 there were in the city of Manila 12 cases of smallpox with 5 deaths.

ST. LUCIA ISLAND.

Report from Castries—Inspection of vessels.

Acting Assistant Surgeon Maylie reports, May 18:

During the week ended May 16, bills of health were issued to 2 steamships bound for United States ports. One of these vessels was fumigated.

No quarantinable diseases exist.

TRINIDAD.

Plague and yellow fever officially declared present.

The following is received from the Department of State, under date of June 5:

The following telegram of June 3 has been received from the consul at Trinidad, West Indies:

Three deaths from plague officially declared here to-day. One death from yellow fever May 31.

VENEZUELA.

Reports from Caracas—Two new cases of plague at La Guaira May 22.

The following is received from the American minister, through the Department of State, under date of May 23:

Consul Moffat left to-day for Guantanamo. Before departure he advised me of the appearance of 2 new cases of plague on May 22.

Plague still present at La Guaira—Fatal case of plague at Caracas.

The following is received from the Department of State, under date of June 2:

The American chargé d'affaires ad interim at Caracas in a telegram dated May 27, via Willemstad, May 31, states that he is informed by the American consulate at La Guaira that since May 25, the date of reopening the port, 7 cases of plague have occurred, 2 of which are known to have been fatal. He adds that the Government has ceased to publish a daily bulletin; also that there was 1 death from plague May 25 at Caracas.

Report from Puerto Cabello—New plague cases at La Guaira—Port to remain closed.

The following is received from the Department of State, under date of June 2:

A telegram, dated May 31, has been received from the consul at Puerto Cabello, Venezuela, as follows:

I am reliably informed that several new cases of plague have occurred at La Guaira. The port will remain closed.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND
CITIES—UNTABULATED.

CANADA—*Ontario, Niagara Falls.*—Month of May, 1908. Estimated population, 9,500. Total number of deaths, 10, including 2 from enteric fever.

QUEBEC—*Sherbrooke.*—Month of May, 1908. Estimated population, 14,709. Total number of deaths, 22, including enteric fever 1 and 4 from tuberculosis.

COSTA RICA—*San Jose.*—Month of April, 1908. Estimated population, 26,682. Total number of deaths, 83, including enteric fever 1, measles 4, whooping cough 1, and 4 from tuberculosis.

CUBA—*Matanzas.*—Month of April, 1908. Estimated population, 35,515. Total number of deaths, 63, including diphtheria 1, enteric fever 1, and 17 from tuberculosis.

FRANCE—*St. Etienne.*—Two weeks ended April 30, 1908. Estimated population, 150,000. Total number of deaths, 151, including measles 1, diphtheria 2, whooping cough 1, and 20 from tuberculosis.

GERMANY—Weimar.—Month of April, 1908. Estimated population, 31,127. Total number of deaths, 38, including diphtheria 1, and 4 from tuberculosis.

GREAT BRITAIN—England and Wales.—The deaths registered in 76 great towns in England and Wales during the week ended May 16, 1908, correspond to an annual rate of 13.2 per 1,000 population, which is estimated at 16,234,952.

London.—One thousand one hundred and ninety-six deaths were registered during the week, including measles 40, scarlet fever 7, diphtheria 8, whooping cough 30, enteric fever 2, tuberculosis 187, and 12 from diarrhea. The deaths from all causes correspond to an annual rate of 13.0 per 1,000. In Greater London 1,650 deaths were registered. In the "outer ring" the deaths included 6 from measles, 2 from scarlet fever, 7 from diphtheria, and 7 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended May 16, 1908, in the 21 principal town districts of Ireland was 20.1 per 1,000 of the population, which is estimated at 1,131,959. The lowest rate was recorded in Drogheda, viz, 4.1, and the highest in Queenstown, viz, 39.6 per 1,000.

Scotland.—The deaths registered in 8 principal towns during the week ended May 16, 1908, correspond to an annual rate of 15.3 per 1,000 of the population, which is estimated at 1,839,038. The highest rate of mortality was recorded in Glasgow, viz, 16.9, and the lowest in Perth, viz, 10.4 per 1,000. The aggregate number of deaths registered from all causes was 541, including diphtheria 1, measles 20, scarlet fever 2, enteric fever 1, and 10 from whooping cough.

JAPAN—Formosa.—Two weeks ended May 2, 1908. Estimated population, 3,050,004. Total number of deaths not reported. Two deaths from enteric fever, 2 from diphtheria, and 136 from plague reported.

MAURITIUS—Port Louis.—Month of February, 1908. Estimated population, 376,625. Total number of deaths, 1,517, including enteric fever 3, diphtheria 4, plague 3, measles 7, and 62 from tuberculosis.

SPAIN—Almeria.—Month of April, 1908. Estimated population, 46,806. Total number of deaths, 113.

Cadiz.—Month of April, 1908. Estimated population, 69,382. Total number of deaths, 172.

Cholera, yellow fever, plague, and smallpox reported from December 28, 1907, to June 12, 1908.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls, through the Department of State and from other sources.]

[For reports received from June 28, 1907, to December 27, 1907, see PUBLIC HEALTH REPORTS for December 27, 1907.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
